

SNOW BOARDING

TRAINING PROGRAM

**Cardio Conditioning
Strength Training
Plyometrics
Flexibility
Balance
Core**

Fit to Play...Live to Play!

Fernie, BC

Strength Training

- ✓ For each exercise perform 3 sets of 12 repetitions (reps), 3 times/week
- ✓ Rest 30 seconds to 1 minute between reps
- ✓ Weight should be significantly heavy that the reps are challenging to complete
- ✓ Start program a minimum of 8 weeks prior to hitting the slopes
- ✓ Slow, controlled motion (3 seconds in, 3 seconds out)
- ✓ No pain on any exercise!

Chest Press

Chest Press Machine,
Dumbbell
or Olympic Bench

Seated Shoulder Press

Shoulder Press Machine
or Dumbbell

Deltoid Raise/Rotations

Low Pulley

Lat Pulldown

Machine, Body Weight or
Gravitrone

Seated Row

Low Row Machine

Wrist Curl Bar

Tricep Dips

Bench or Gravitrone

Squats or Leg Press

Olympic Bar or Leg Press
Machine

Calf Raises

Power Squat Machine

Seated Leg Curl

Leg Curl Machine

Kick Backs

Hip Machine

Abductor/Adductor

Hip Machine or Low Pulley

Cardio Conditioning

Whether you want to tackle the tables and rails of the park, squeeze some tight glades or just circuit that secret hike-to stash all day long...cardio conditioning is the key to ensuring endurance and stamina and reducing the risk of injury at the end of the day!

- ✓ **Minimum:** Perform cardio at least 3X per week for 20 minutes on any piece of cardio equipment that you enjoy (change it up frequently to stay entertained)
- ✓ Maintain a **Heart Rate** of at least 65% maximum, maximum HR = $220 - \text{age}$ (example – 32 years old: Max HR = $220 - 32 = 188$, 65% = 122)
- ✓ **Interval training** will help prepare for the demands of skiing: short intense bursts of work down the hill (or hiking up one) followed by a long rest as you ride the lift back up. Try a 1:4 work to rest ratio training (example – sprint for 30 seconds, jog for 2 minutes)
- ✓ Try a SPIN class, *X-Train SPIN* is designed specifically for recreational athlete conditioning

Flexibility

A stretching program will assist in a good range of motion in your joints and enable your body to handle unexpected movements or sudden grabs of your board or arms.

- ✓ Key areas of overuse and muscle strain: Quadriceps, Hamstrings and Calves
- ✓ Any YOGA class will dramatically improve flexibility, *Yoga Fit* is designed specifically for the demands and common injuries associated with skiing and snowboarding.

Quadriceps

Hips & Quads

Hamstrings

Calves

Hips & Gluteals

Hips & Lower Torso

Abductors & Back

Upper Back

Shoulders

Arms & Wrists

Neck

Pectorals

Balance & Core

The core is truly the foundation of your body; a strong core means a strong foundation!
Balance conditioning trains the crucial and often overlooked small stabilizer muscles.

- ✓ Try the *CORE DYNAMICS* conditioning class to learn new exercises and variations
- ✓ *Bongo Board*
- ✓ *Wobble Board*: One-foot stands, Lunges with front foot on wobble board
- ✓ Aim to perform 2 sets of 10-15 repetitions in a slow, controlled motion

Plyometrics

Plyometrics exercises are designed to condition the body for short bursts of power and reactive shock absorption on landings.

Squat Jumps

Box Hops

Twist Jumps

When to see a Trainer...

- ✓ *Fit to Play* programs are designed for individuals in good physical shape, if you have any **chronic pain or previous injury** you should consult a personal trainer for an customized program
- ✓ *Fit to Play* programs are **starting point exercises**, once you have become familiar and comfortable with these basic exercises you may want to consult a personal trainer for more challenging and advanced exercises specifically suited to your needs and fitness level.
